Introduction to Monopoly World Edition

The Monopoly World Edition reimagines the traditional property trading game within a global context. This thematic shift aims to broaden players' perspectives, introduce international geography, and increase strategic depth. Key Features: - International property set - Special "Global Market" and "Tourism" cards - Currency differences (if playing with international currency variants) - Unique game tokens representing world landmarks Understanding these features is foundational before delving into the rules, as they influence gameplay mechanics significantly.

Game Setup and Components

A detailed setup ensures smooth gameplay and adherence to rules. The components typically include: - Game board with world map-themed properties - Player tokens representing global landmarks - Monopoly money or alternative currencies - Property deed cards - Chance and Community Chest equivalent: "Global Market" and "Tourism" cards - Houses and hotels with international branding - Dice (standard two six-sided) - Title deed cards for each property

Setup Steps:

1. Choose Tokens: Each player selects a landmark token, e.g., Eiffel Tower, Sydney Opera House.
2. Allocate Starting Funds: Distribute an equal amount of currency

to all players, e.g., \$1500 or equivalent in local currency. 3. Place Tokens: Position all tokens on the “Start” space, often labeled “Global Hub.” 4. Shuffle Cards: Mix the “Global Market” and “Tourism” cards and place them facedown on their designated spots. 5. Distribute Properties: Prepare property deed cards and arrange the properties on the board accordingly. 6. Decide Turn Order: Roll dice to determine who begins, with the highest roll starting. Attention to detail during setup prevents disputes and ensures fair play.

Gameplay Mechanics

The core gameplay of Monopoly World Edition adheres to traditional mechanics with several thematic and rule modifications to accommodate the international theme.

Turns and Movement

Players take turns clockwise, rolling two dice to move their tokens around the board. Movement rules are the same as classic Monopoly, with special spaces triggering different actions: - Property Spaces: Opportunity to buy or pay rent. - Global Market Spaces: Trigger special global trade events. - Tourism Spaces: Draw tourism cards offering bonuses or penalties. - Chance and Community Chest-equivalent: Draw “Global Market” or “Tourism” cards. - Special Spaces: Tax, airport, or border crossing spaces. Key Point: Landing on unowned properties allows purchase; landing on owned properties requires paying rent, with increased rent if properties are monopolized.

Buying Properties and Monopolies

Properties are divided into regions (continents), with each region representing a continent or country, e.g., Europe, Asia, Oceania, Americas, Africa. - Purchasing: When landing on an unowned property, players may buy it at the listed price. - Monopoly: Owning all properties within a region grants a monopoly, doubling rent and unlocking building options. - Developments: Houses and hotels can be built once a monopoly is established, increasing rent significantly. Special Rule: Some properties may require international treaties or agreements for development, adding an extra layer of negotiation.

Building Houses and Hotels

- Houses and hotels are purchased from the bank and placed on owned properties. - Building must be uniform across a region. - Houses can be built evenly across properties; no property can have more houses than others in the same monopoly. - Hotels are purchased after four houses are built on a property. Tip: Strategic development in high-value regions can yield substantial rent income, but overextension may risk liquidity.

Global Market and Tourism Cards

These special cards introduce global economic and cultural elements: - Global Market Cards: Trigger worldwide events affecting all players, such as currency fluctuations or international trade bans. - Tourism Cards: Offer benefits like extra income, free properties, or penalties such as increased taxes or travel restrictions. These cards add unpredictability and simulate real-world international dynamics.

Financial Transactions and House Rules

Rent and Payments

Rent is calculated based on the property's value, developments, and monopolies. Additional international factors may influence rent, such as regional taxes or tariffs.

Building and Developing

- Players can build houses and hotels on properties they own, following regional development rules. - Development costs vary by property and region. - Some editions include restrictions on development in certain regions due to international treaties.

Bankruptcy and Trading

- When a player cannot pay rent or debts, they declare bankruptcy, and their assets are auctioned or redistributed. - Trading properties, money, and cards is encouraged, often with international negotiations and agreements.

Special Rules for International Play

- Currency Variations: Some editions allow players to use different currencies; currency exchange rates may be used for transactions. - Border Crossing: Landing on border crossing spaces may require paying tolls or obtaining visas, adding strategic considerations. - Travel Restrictions: Certain spaces may restrict movement or impose penalties, simulating global travel issues.
