3. **Galaxies:** Entire galaxies, such as the Andromeda Galaxy, span hundreds of thousands of light-years, containing billions of stars and cosmic phenomena.

The Search for Extraterrestrial Life and Giants

Scientists continue to explore the universe for signs of life beyond Earth. The potential discovery of extraterrestrial civilizations raises questions about whether advanced beings might be “giants” in some sense—either in size, intelligence, or technological prowess. While biological giants are unlikely due to the limits of physical laws, the concept of cosmic giants—massive structures or civilizations—remains a fascinating area of scientific speculation.
