Origins and Evolution of Pioneering Portfolio Management

Historical Background

The concept of portfolio management has roots dating back to the early 20th century, notably with Harry Markowitz's Modern Portfolio Theory (MPT) introduced in 1952. MPT revolutionized investment by emphasizing diversification and quantifiable risk-return trade-offs, laying the groundwork for systematic investment strategies. However, as markets evolved and complexity increased, traditional models faced limitations. The 20th century saw the development of various strategies, including active management, passive indexing, and risk parity approaches. Yet, these often relied on historical data and static models, which proved insufficient in periods of market upheaval or technological disruption.
