The term "kamikaze" translates to "divine wind" in Japanese, historically referring to the typhoons that thwarted Mongol invasions in the 13th century. During World War II, the term was repurposed to describe the Japanese suicide pilots who carried out deliberate crashes into Allied ships. The emergence of kamikaze tactics was driven by Japan's increasingly dire military situation in the Pacific Theater. By 1944, the Allies had gained significant momentum, and Japan faced mounting losses. Facing a shortage of experienced pilots and aircraft, the Japanese military leadership decided to adopt desperate measures, including suicide attacks, to slow down or halt the advancing Allied forces.

Formation of the Kamikaze Corps

Kamikaze pilots were primarily recruited from the Imperial Japanese Army and Navy. Many of these young men were motivated by a sense of patriotic duty, loyalty to the Emperor, and a desire to protect their homeland at all costs. The Japanese government and military authorities also promoted the idea that sacrificing oneself was a noble act that would bring honor to one's family and country. The first official kamikaze attacks occurred during the Battle of Leyte Gulf in October 1944. These attacks marked a new phase in the Pacific War, characterized by suicide missions that aimed to inflict maximum damage on Allied ships.
