Color Groups and Categories

The Pantone Formula Guide categorizes colors based on hue groups such as Reds, Blues, Greens, Yellows, and Neutrals. Each group contains a range of shades from light to dark, vibrant to muted.

Coated and Uncoated Chips

The guide typically features two sections: - Coated: Colors designed for glossy or coated paper surfaces, which tend to make colors appear brighter and more vibrant. - Uncoated: Colors for matte or uncoated paper, often appearing softer and more subdued. Having both options allows designers and printers to select colors that will look consistent across different paper types and finishes.

Color Codes and Numbering

Each Pantone color has a unique identification number: - C (Coated): For coated paper and finishes. - U (Uncoated): For uncoated paper. - M (Matte): Sometimes used for matte finishes. For example, Pantone 199 C refers to a specific red color on coated paper, while Pantone 199 U refers to its uncoated counterpart.
