2. Open Android Studio and update to the latest version if needed.
3. Create a new project with the target SDK set to API level 33.
4. Configure your emulator with Android 13 system image for testing.

Creating a New Android 13 Project

To maximize compatibility and access all Android 13 features:

1. Choose “Empty Compose Activity” or “Empty Activity” as your template.
2. Set minimum SDK to at least API 33 for full feature support.
3. Configure build.gradle files accordingly to target Android 13 SDK.

Implementing Core Features of Android 13

This section covers practical recipes for integrating Android 13 features into your apps.

1. Using Photo Picker API for Secure Media Access

Android 13 introduces the Photo Picker API, replacing traditional media access permissions with a more privacy-centric approach.

1. Request permission to access media via the Photo Picker API.
2. Launch the photo picker intent and handle the result.

```
// Launch photo picker
val intent = Intent(Intent.ACTION_PICK).apply {
    type = "image/"
}
startActivityForResult(intent, REQUEST_CODE_PICK_PHOTO)

// Handle result
override fun onActivityResult(requestCode: Int, resultCode: Int, data: Intent?) {
    super.onActivityResult(requestCode, resultCode, data)
    if (requestCode == REQUEST_CODE_PICK_PHOTO && resultCode == Activity.RESULT_OK) {
```

```

        val imageUrl = data?.data
        // Use the image URI as needed
    }
}

```

2. Implementing Material You Dynamic Colors

Android 13 enhances the Material You design system, allowing apps to adapt to the user's wallpaper.

1. Enable dynamic color support in your theme.
2. Use Material 3 components to automatically apply dynamic colors.

```

// In themes.xml

// Applying dynamic color in Compose
MaterialTheme(
    colorScheme = dynamicLightColorScheme(context)
) {
    // Your composable content
}

```

3. Enhancing Privacy with Notification Permissions

Android 13 updates notification permission requirements for all apps targeting API 33.

1. Request POST_NOTIFICATIONS permission at runtime.
2. Handle the user's response appropriately.

```

if (ContextCompat.checkSelfPermission(this,
Manifest.permission.POST_NOTIFICATIONS) !=
PackageManager.PERMISSION_GRANTED) {
    ActivityCompat.requestPermissions(this,
arrayOf(Manifest.permission.POST_NOTIFICATIONS),
NOTIFICATION_PERMISSION_CODE)
}

```
