What Are Systems of Linear and Quadratic Equations?

Linear Equations

Linear equations are algebraic expressions where the highest power of the variable is one. They can be written in the form:

1. $ax + b = 0$
2. or in slope-intercept form: $y = mx + c$

Solutions to linear equations typically involve finding the value of the variable(s) that satisfy the equation. When dealing with systems of linear equations, we work with two or more such equations simultaneously.

Quadratic Equations

Quadratic equations are polynomial equations of degree two, generally written as:

1. $ax^2 + bx + c = 0$

Solutions involve finding the roots of the quadratic, which can be real or complex numbers. Quadratic systems involve two quadratic equations, which can be solved using substitution, elimination, or graphical methods.
